JIG STRENGTHENS ITS NORTH CAROLINA BREADTH OF SERVICES AND CAPABILITIES WITH NEW TRIANGLE AREA OFFICE

***New N.C. office located in Cary and led by industry veteran John Maynard helps position JIG
as regional leader for water, wastewater, stormwater, community planning and
environmental projects***

CARY, N.C. – The 475-person engineering, planning, and consulting services firm of [Jordan, Jones & Goulding \(JIG\)](#), recently opened a second office in North Carolina to provide the Triangle area and all of eastern N.C. with access to the company’s extensive set of water, land and transportation services.

JIG’s comprehensive service offerings provide communities with an established and multifaceted set of resources to address client needs spanning water, water resources, stormwater and infrastructure concerns to transportation, parks, trails and community planning. The extensive services and skills offered by JIG present community leaders and residents with unique, effective resources to answer many of today’s environmental, regulatory and technological challenges.

“Our new Cary office is an important component of our strategic regional expansion to better serve the needs of area clients and communities,” said Don Allen, president and CEO of JIG. “We are pleased to bring additional capabilities to the region and believe we offer an exceptional set of services thanks in part to our team of senior leaders who add indispensable experience and deep relationships with clients throughout the state.”

JJG Expands Presence in North Carolina / Page 2

JJG has experienced continued success and growth in North Carolina and currently services clients from the company's office in Charlotte. The second office allows JJG to provide additional resources and capabilities to government and industry entities seeking wide-ranging, single-source services.

The firm recently hired senior professional engineer, John H. Maynard, Jr., P.E. to lead the office and further support JJG's presence in the region. Maynard joins Howard Kimbrell and another recent senior hire, F. Ross Stroud, P.E. Together, they will guide the Cary office staff in leveraging the full-service resources of JJG to best address the environmental and community needs of public and private sector clients.

As office manager, Mr. Maynard brings more than 36 years of industry experience, almost exclusively with public and private sector clients in the state of North Carolina. In his new position he will be responsible for overall client and project management activities, business development, regional client relationship management and the tactical operations of the office.

Mr. Maynard offers extensive experience in the planning, design and project administration for major surface and subsurface water supply, treatment, and distribution systems including elevated storage tanks, wastewater collection and treatment facilities, and large capacity water and wastewater pumping stations.

F. Ross Stroud, recently appointed Senior Process Engineer for the new office, will assist in organizing processes and teams, oversee the planning and execution of client projects and serve as a senior subject matter expert. Stroud's experience includes more than 30 years in the management, evaluation, planning, design, and construction of major wastewater projects including advanced tertiary treatment facilities involving biological nutrient removal, collection systems and pumping stations.

The new JJG office is located in the Centre Green office park located just off of Weston Parkway and a short distance from the Raleigh-Durham International Airport. For more information or to contact the JJG Cary office please call 919-678-8032.
